Shademaster Locust

Sunburst Locust

For many years there has been a growing need for new and better shade trees.

Due to Dutch Elm disease the graceful American Elms are passing from the scene. Here are two new Locusts, perfect replacement trees for American Elm.

We have painstakingly examined over 20,000 individual trees. Our effort has resulted in what we and our visitors proclaim to be the **FINEST THORNLESS HONEYLOCUSTS.**

Their outstanding characteristics are:

Freedom from disease and insect pests, holds foliage late in the fall, deep roots, grass will grow right up to the trunk, no leaf raking in the fall. The cleanest shade tree you can buy.

We offer the two best new Locusts.

3445 Sunburst Golden Locust

3455 Shademaster Green Locust

Both are beautiful and grow as described above. Strong, well rooted trees, 5 to 6 ft., \$6.95 each; 2 for \$12.00, prepaid.

4134 "POOR MAN'S ORCHID"

IRIS SHILKA

Many years ago as a crowded, uncomfortable train puffed its way across the endless barren plains of Siberia, Prof. Hansen, an American passenger, was electrified by the sight of patches of what appeared to be Orchids blooming in that desolate region, near the small town of Shilka. As the train stopped at the station, Prof. Hansen left it to satisfy his curiosity. When he made a closer inspection of the plants he found them to be of the Iris family, but their form and color so closely resembled the Orchid that he immediately thought of the descriptive phrase, "Poor Man's Orchid." He secured several of the plants and brought them home to America with him. Several years of propagation and development showed them to be perfectly adapted to our climate and they were placed on the market under the name of **Iris Shilka**, recalling the name of the Siberian town where they were first found. **We offer nice field-grown plants, blooming size, 50c each; 4 for \$1.75, postpaid.**

GLOWING GARDEN COLOR WITH CUSHION MUMS

GORGEOUS DISPLAY OF COLORFUL BEAUTY THROUGH SUMMER AND FALL

Bushels Of Flowers . . . Like This In 100 Days!

Every Plant Entirely Covered with Flowers—Blooms 8 to 10 Weeks Starting This Aug.

When in bloom, all foliage is covered with colorful flowers, forming a spotlight of beauty in your garden. These compact, low-growing plants seldom exceed 12 inches high. Because they spread two feet or more, they are ideal for planting in front of shrubs or evergreens. As a garden plant they are unsurpassed. They require almost no cultivation. Even when neglected they produce a brilliant mass of color that never gets out of hand. Planted in a row, they form a wonderful low border that turns into a maze of color at blossom time.

Very hardy. They'll repeat their amazing performance each year, multiply in beauty and color with each succeeding year. Set plants not less than 18 inches apart.

8602 CHRISTMAS HOLLY (Ilex Opaca)

FOR HAPPY HOLIDAYS GROW YOUR OWN CHRISTMAS HOLLY

KRIDER'S SEXED TREES. MALE AND FEMALE. GUARANTEED TO PRODUCE BERRIES.

Holly is beautiful the year around, but in winter when other evergreens become drab and brownish it is the one plant in your garden that sparkles. The leaves are deep dark green and the brilliant red of the berries really stand out against this background. After years of study, selection and breeding, we have succeeded in propagating separate species, male and female, which are extremely hardy and easy pollinating to assure plenty of berries. **If you are to have berries on your female Holly you must have a pollinating male companion.** Christmas Holly will do best in partial shade. Plant in any good garden soil. The use of leaf mold or peat moss in planting and later as a mulch is recommended. Holly can be used any place in your garden where you would plant a pyramidal evergreen, but we recommend planting where it may be seen from your windows.

Male or female plants (we recommend 2 females and 1 male), 8-12 in., \$1.75 each; 3 for \$5.00, postpaid.
